

# How to Enter Your Virtual Race Results

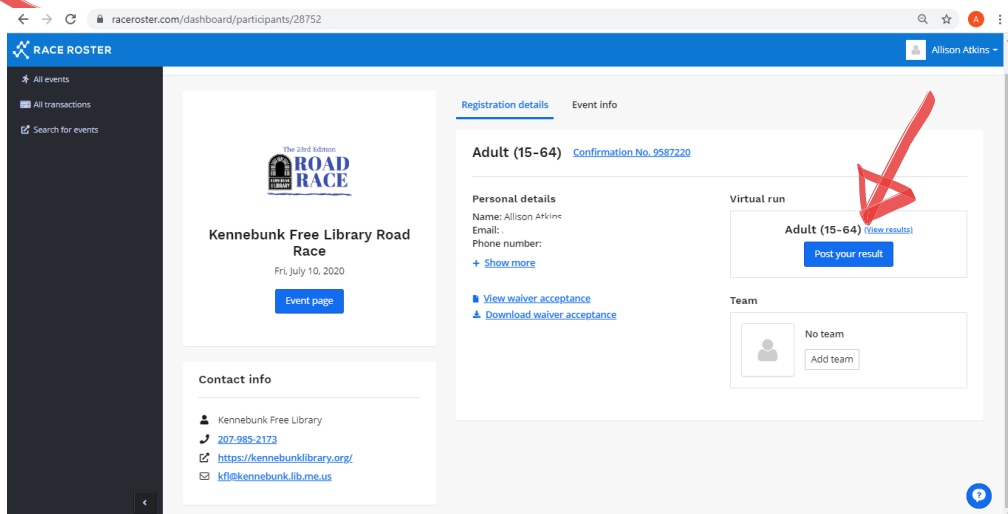

When you register, you get a confirmation page like this.

Click on participant dashboard at the bottom.

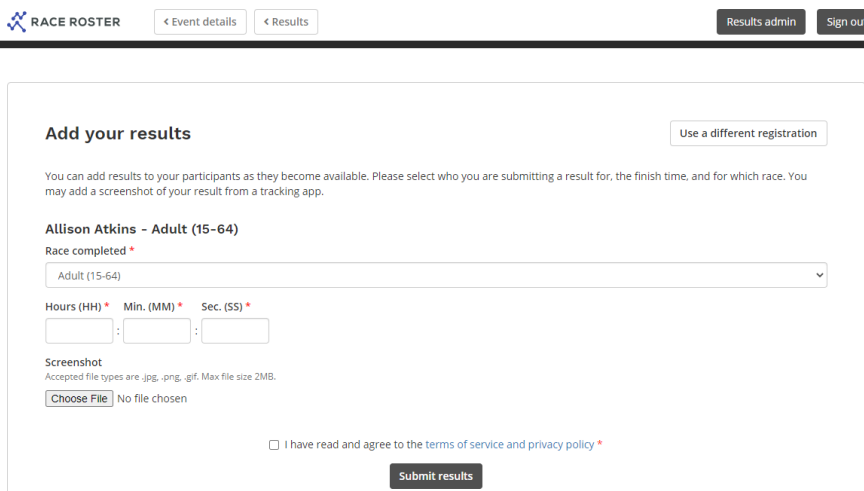

Your dashboard looks like this. You can access it at any time by logging into your Race Roster account.

Select "Post Your Result"

Add your time to this page. If you used an app to track your results, you have the option to upload a screenshot.

Screenshots are not required for prizes - we're relying on the honor system.

Once you've successfully entered your results, you will get a certificate with your time and ranking. It can be downloaded or shared on social media.
